K4N GRID DXPEDITION to EL84xn

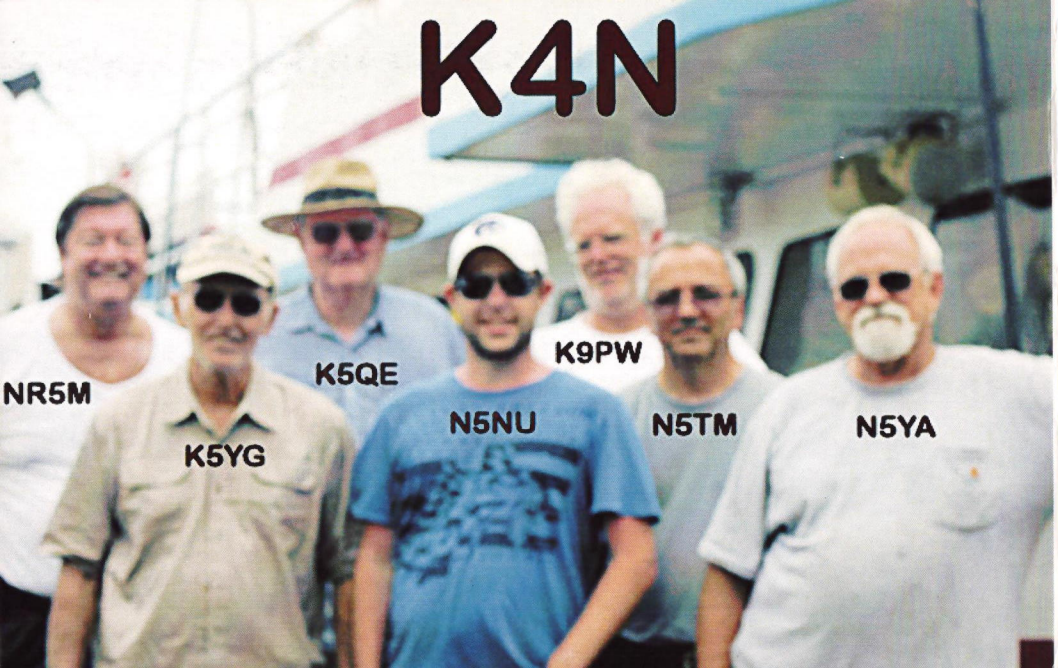
KEY WEST, FL

JULY 11th-JULY 15TH, 2013

K4N

6m/2m - SSB/CW/EME/Digital

EL84 DXpedition, 11 July - 15 July 2013



The 2013 K4N DXpedition to EL84

A Grid Bandits Event

This year, the K5N Grid Activation Group attacked EL84 off the FL Keys. EL84 has been a super rare grid for years, just because of how hard it is to activate. We chartered the Yankee Capts, a fishing vessel, with Capt. Greg and First Mate Lyndon. Both of these men were extremely helpful to our DXpedition. We all thank them profusely.

Using the K4N callsign, we worked 50 QSOs on 2M and 1500+ QSOs on 6M. After dupes, we had 1401 contacts on 6M. The ops this time were Bill-N5YA, Bill-K5YG, Pete-K9PW, George-NR5M, Dan-N5TM, Jason-N5NU, and Marshall-K5QE. The picture at the left was caused by a slight camera problem, but it shows how "out of focus" we were after 5 days on the ocean. We want to thank Joey-W5TFW, our QSL manager and JD-N0IRS for our logo and web page.

Confirming QSO With	Date			UTC	MHz	RPT	Mode	Grid
	Month	Day	Year					
N9BCA	July	12	2013	2213	144 (50)	5-9	CW (SSB) DIGI	EL84
